

# 農業政策研究中心

## ► Agricultural Policy Research Center

### 成立宗旨

無論於經濟結構與生態功能方面，農業對於一個國家而言，皆扮演舉足輕重的角色，然而，如今台灣農業面臨休耕地面積過大、農民實質所得過低、糧食自給率不足、及加入貿易自由化帶來的衝擊等嚴峻挑戰，無論身為政府官員、研究學者或是農民，皆應該為台灣農業貢獻一己之力。

農業政策研究中心之成立宗旨，即為協助學者專家之各項相關研究與活動，希冀本中心之微薄之力有助於規劃台灣農業經營方向與具體作法。

### 組織

本中心隸屬中興大學農業暨自然資源學院，組織完善，致力於各項農業推廣活動，積極參與相關研究計畫，提供農業新知，推動各項學術交流，進一步推動國際農業合作，並將目標分階段設定為本中心可具體執行之政策等，期對改善農村環境，提高農民生活水準有所助益。

### 功能

辦理農業永續發展之各項活動，加強國內農業政策人材培育，接待來訪國外農政官員，促成農業政策與教育之國際交流，提升本校對國內外農業發展與政策之影響力。

Visit of international agricultural specialists

### Setup Purpose

Agriculture plays a major role for a country in both economic structure and ecological function. However, agriculture in Taiwan is currently facing major challenges, excessive fallow land, low real income for farmers, a lack of the food self-sufficiency rate, and the effects of free trade. The center provides assistance in various related research and activities. We hope the center will help plan the direction of agriculture and specific practices in Taiwan.

### Structure

The center is subordinate to CANR at NCHU, and is located on campus, and includes researchers and staff members. We are committed to spreading agriculture-related activities, and actively participate in relevant research projects to promote agricultural emergence. We also promote various academic exchanges to reach specific goals.

### Functions

The center is responsible for organizing activities related to sustainable agriculture development, incubating domestic personnel for agricultural policy, the reception of agriculture officials from abroad, promoting international exchanges regarding agricultural policies and education, and enhancing the influence of NCHU in domestic and international agriculture development and policymaking.
